FEATURED SERMON: Add it to your own website! - posted by sermonindex (), on: 2006/5/24 1:36

To add the featured sermon from sermonindex to your own website simply copy the below code into your blog or webpage. By adding this to your website you are allowing a life-changing message to be downloaded and heard by many others who would not normally hear it.

The featured sermon will automatically change every 2 weeks with a new sermon, there is no need for you to change or update the code, it will change automatically! This is great dynamic content for your website to keep visitors coming back.

Simply copy the code below into your webpage or blog, if you have put it on your website, reply to this message and share your weblink where the script is:

<SCRIPT LANGUAGE="JavaScript" type="text/javascript" src="https://www.sermonindex.net/fs.js"></SCRIPT>

Re: FEATURED SERMON: Add it to your own website! - posted by sermonindex (), on: 2006/5/25 2:13

I noticed the script on this brothers blog at the bottom of the page:
http://www.everydaymadenew.blogspot.com/

If you add the script to your site or blog do put a post here letting us know where it is. This is a great way to share powerful sermons with others.

Re: - posted by sermonindex (), on: 2006/5/25 19:56

I also noticed the script on these blogs:

I just want to say thanks for making the script available to those of us trying to reach out to people on the 'net with powerful words of wisdom based in Scripture. I run a ministry called United in Jesus and have recently added an audio section that this link takes pride of place.

Hello Greg!
In my msn space, I can't add links like those, for these kind of spaces has their limitations but IÂ´ve posted a direct link to this web-site in my msn space, which i would like to share with others. This web-site has been of great blessing to my life, God bless your ministry.

could I have some help putting this on my xanga blog? I'm not sure where to put the code. :-?

Re: - posted by repentcanada, on: 2006/6/6 19:59

Vico, if it was blogspot you were on I could help you - sorry. I'm sure someone will be able to help you.

I am pretty sure you just edit your blog page and in the footer or header section you just put the code. You need to ensure that html can be viewed in that section you put it. If you email xanga.com with the code and ask them where you could put it to show where you want it they would help you also.

Re: - posted by sermonindex (), on: 2006/6/11 20:51

I added the script to a xianz.com group page:

I added it to my Blog! Thanks. I hope people who view my blog will come to be blessed by all the great resources here.

Re: - posted by PaulWest (), on: 2006/7/20 15:08

It's on my blog now, too. What a blessing this place is! It's like a blue oasis in the midst of a parched desert. I thank the Lord He led me here.

I tried posting it on MySpace, but it only showed the code. Is there a specific code for MySpace?

I am not sure about this, are there any other people that use myspace alot and have knoweldge on how to get it up? I know that you would have to put the code into a field that supports HTML.

Here is the code for Xanga and myspace layouts

```
< form action="https://www.sermonindex.net/modules/mydownloads/visit.php?lid=4229" method="post">
< input type="hidden" name="cmd" value="_s-xclick">
< input type="image" src="https://www.sermonindex.net/featured_sermon2.gif" border="0" name="submit" alt="Sermon"
>
```

Only one alteration is needed there are 3 "< " things and there is a space after them. you have to take these spaces out. I had to put the spaces in there so it would show up on the forum post.

I do not know if it changes every 2 weeks. I pray it does but this i do not know. and even if it doesn't change. its very simple to change or i can repost a new one every 2 weeks

Blessings
Michael

Re: - posted by Majorpancake, on: 2006/10/1 20:47

Ok So The Picture Changes But Not The Actual Sermon

so Heres what u gotta do

Change This

```
< form action="https://www.sermonindex.net/modules/mydownloads/visit.php?lid=4229" method="post">
```

to THis

```
< form action="https://www.sermonindex.net/modules/mydownloads/visit.php?lid=13464" method="post">
```
