Hi Joel,

2 quick things for forum ediquite could you not use ALL CAPS in your posts and secondly refrain from linking to the same site every post ie needgod.com.

Its a great question you have towards the recordings on the site that are over 80minutes long. You will have to download the file and also download a music editor such as: <http://audacity.sourceforge.net/> audacity. And simply cut the file in half and save both parts seperately to burn on seperate discs.

hope it works out.
