I have added a podcasts subscription link to the front page of the site under the featured sermon. By clicking on that link you will "subscribe" yourself with the itunes software to the "sermonindex.net classics" podcast.

The podcast has some of the best sermons on sermonindex and each show are released with each email newsletter every 2 weeks. Once you are subscribed you get each show automatically sent to you through the itunes software. And it is easily transferable to your ipod.

I also added the podcast subscription banner to every page in the download section: <https://www.sermonindex.net/modules/mydownloads/>
