Forgive me if this has been asked before, I couldn't find it by search.

How do I make it the default to see the oldest posts first in a thread. I know how to do it once I open the thread but that gets annoying every time and confusing when you forget.

go to "view account" and there select edit profile.... and scroll down and you will find a box where you can change this

Thanks bunches, this helps a lot. I looked around the account area before, but I guess I just didn't see it.
