

## SermonIndex Announcements :: Help needed UPLOADING sermons!

### Help needed UPLOADING sermons! - posted by sermonindex (), on: 2003/7/28 16:26

If you are Intrested in helping out this ministry and help spread these sermons across the internet then this might be the thing for you!!

I have talked with **SermonCast** [www.sermoncast.net](http://www.sermoncast.net) and they have set up a section for the WRT Books (SermonIndex) Ministry! ([http://www.sermoncast.net/icbr.asp?BROADCAST\\_IDwrt](http://www.sermoncast.net/icbr.asp?BROADCAST_IDwrt)) [http://www.sermoncast.net/icbr.asp?BROADCAST\\_ID=wrt](http://www.sermoncast.net/icbr.asp?BROADCAST_ID=wrt)

If you are intrested in getting our sermons up there then here are some of the things you will be doing:

1. Downloading specified sermons off of SermonIndex to your computer.
2. Loggin into SermonCast and creating sermon profiles and then uploading the sermon onto SermonCast.

If you have the patience and desire to do this and help out please email me at [info@sermonindex.net](mailto:info@sermonindex.net)

Question:

Being that I am on a dial-up connection downloading is a bit slow, but what about uploading?

Would love to help out...just curious.

-----dial-up connection

OUCH! yea sorry but I think it would be way to time consuming on a dial up connection. I think on dial-up the upload is slower than the download imagine that! :(

Uploads are slower on all connections (unless you pay extra for it). On top of that, most ISP's do some form of packet shaping so a large upload gets limited to an even more restricted bandwidth. ...At least that's they way the ISPs work in Ohio. :-)

Phillip
