SermonIndex Announcements :: Bandwidth increase on sermonindex.net!

Bandwidth increase on sermonindex.net! - posted by sermonindex (), on: 2008/1/10 15:09

Saints,

There has been a signifigant bandwidth increase on sermonindex.net in the new year and just before. We have updated the servers to amazon aws hosting but that proved to be too expensive as a single hosting solution. So we purchased 3 shared server accounts to help the hosting situation.

We are still in the process of getting all the sermons on these 3 servers! So right now when you click on a sermon downl oad link at sermonindex it forwards to a server that is available. This has been a good solution is decreasing the amount of money needed to run the sermon hosting per month signifigantly. But during this tranistion it has been costly.

Thank you for your continued prayers and support. I think this is a "great" problem to have! :-)   in the last few days over 30,000 downloads occurred on one podcast file alone.

Currently there are 4 servers. I am uploading content to the third server and helping to start to get it online.

Also there is another server we will be adding soon also. Praise God for the increase and demand for the sermons and t he podcasts.

wow

Praise God.
