

**SermonIndex Support :: Is there something wrong with the downloading of Audio?****Is there something wrong with the downloading of Audio? - posted by BlazedbyGod, on: 2008/1/11 16:09**

I have been trying to listen to a few audio's but I keep getting this message:

Bad Gateway

The following error occurred:

The IP address was not found during the DNS lookup. Contact your system administrator.

Would anyone happen to know why this is happening?

Please let me know the specific files you are having trouble downloading. Is anyone else having problems downloading the sermons?

We have had to change the server setup greatly to accommodate increased bandwidth and costs to serve the files. your prayers and support are appreciated.

I had problems yesterday with Ravenhills The judgment seat of Christ video, i recommended it to a brother and he could not download it, and not me either

but then i could today.... but i thought i mention this here

**Re: - posted by BlazedbyGod, on: 2008/1/11 17:21**

To be honest, it was a few Ravenhill sermons, then a few Dave Wilkerson sermons-then it just became any sermon I tried to open.

**Re: - posted by SimpleLiving (), on: 2008/1/12 16:22**

I just tried to listen to A Man of God, the interview with Leonard Ravenhill and it stops playing about 1/4 of the way through it and starts over. The link I used was the one in the Top 25 Downloads. I tried to view it, not download it.

I'm off to try the Welsh Revival Video. I'll come back and let you know how it goes.

Just tried it. Didn't know it linked to a different site.

**Re: - posted by BlazedbyGod, on: 2008/1/17 11:27**

I am still having the same problem.

I just tried to download the featured message: Humanizing God by Lou Suter, which is 7+ MB and I only could download 1.37 MB. Numerous retries failed. :-)

Well, I came back to the home page and tried downloading it direct from there and it downloaded fine. Later on tonight, I'll get a chance to listen. Thanks so much.

:-)

Rut-roh! This is on my agenda tonight. I'm really looking forward to it, too. I'll come back and let folks know if it works for me.

I have tried several times on different days to download or even just listen to the new Paul Washer audio and the now Corrie Ten Boon video and I keep getting that it is a broken link. What does that mean and is there something I should be doing different?

Thanks,  
Steve
