My sister was at a meeting on Wednesday or Thursday and heard this man. She told me some of the things that he talked about, but she ordered a dvd and gave one to me today.

He talks about the fact that a man, a very high up exec, told him many things that would happen in the USA. For instance, oil will drop to \$50 a barrel; the value of the dollar has been on a steady decline and would eventually collapse and cause financial turmoil, oil would be found in Russia and Indonesia.

I have listened to this and wanted to know if anyone else has ever heard of this man and what they think of what he is saying.
