a bible online - adobe flash or microsoft silverlight? - posted by prosh0t, on: 2010/6/16 17:28

I'm looking for a good bible application - online (a rich web application). Not one I have to download and install. Are there any ones out there made in adobe flash or microsoft silverlight? I don't prefer bible gateway because it's a bit slow to browse around in there.

Thanks!
