SermonIndex Support :: Search engine problem

Search engine problem - posted by InTheLight (), on: 2004/12/15 17:28

I'm having trouble using the search feature. For example, when I do a search for a particular text string the search engine shows me the latest 5 hits and then a link that says "show all results". When I click on that link nothing happens. How do I view more than just 5 hits for my search string?

Thanks,

Ron

Hi Ron, when you click on the 'more results' link for each category it should give you many more listings.. it might take a bit to load.. Hmm if its not loading that is an interesting problem. What type of browser are you using?

Greg, it does appear to be browser related, I am running Opera 7.50. The 'more results' link does appear to work using IE6.

In Christ,

Ron

Since you brought it up...

Noticed that when conducting a search and say you go forward through a couple of pages, clicking 'more results'. When I hit the 'back' button I get the infamous "This page cannot be displayed"...

Using IE 6
