I am seeking to find a good Christian run web hosting service for a new site I am working on. Can anyone here offer any recommendations? Any good hosts that you work with or know of? Cost is important and I will also require a host that supports Frontpage Extensions. Thanks.

In Christ,

Ron

Re: Christian free web site host - posted by Tears_of_joy, on: 2005/1/24 14:00

Hi Ron,

I don't know about paid christian web hosting, but I can suggest one free christian web hosting (<http://christian.net>) <http://christian.net> Actually you are registering an e-mail and you have automatically 10MB web space without adds. I have e-mail there, I am contented. They have POP3 server (you can use any e-mail program Outlook, Eudora, etc.) but they do n't allow to use the SMTP server for sending mails, you need to send mails from web, like others web based mails as Yahoo, Hotmail. etc. the url of your page is <http://yourname.christian.net> they support FTP upload, I think there is an option for upload from Frontpage.

I hope this information will be useful to someone.

Kire

Hi Brother Ron,

I would recommend you use: www.pjlhosting.com this brother does a great job to get cheap hosting for ministries. and I unashamedly recommend people to him. I think you will find it very reasonable.

Thanks Greg! PJL is perfect for my needs.

I just signed up with them and listed you as the referrer so if you do any business with them you should get a credit.

In Christ,

Ron
