

SermonIndex Support :: problems with video**problems with video - posted by proudpapa, on: 2012/6/20 22:46**

Trying to watch video series by Dean Taylor Anabaptist History. I do not have sound with any of that series but fine sound with all the other videos and more odd than that when I had it on (Anabaptist History (Day 1) Welcome) my entire computer shut down.

Brother,

The sound is very low on those recordings so I recommend using headphones to hear it better. And ensure you have the volume up on the player. You might need to install the latest version of flash to play the video right.

Thank you, I turned the volume up all the way on the speakers and did not hear anything, but I will try headphones.

Hi!

If you should need these videos to have their audio volumes increased, I would happily volunteer to do that for you. I note that they are being presented on a YouTube Channel. After they are remedied, you would have to exchange the old video with the new at YouTube yourselves. Let me know. Happy to help in any way I can.
