

SermonIndex Announcements :: not getting video on Hovind**not getting video on Hovind - posted by yeshuasrose (), on: 2003/9/17 13:12**

HI,

I am not getting the video on Kent Hovind's videos. One I think I need to redownload because it won't play at all. It says something about corrupted files.

The other one, the Garden of Eden, says something about error downloading codec. It plays the sound, but not the video .

Any suggestions? Do I need something other than windows media to play it?

Thanks for your help.

Also, I went to redownload and can't find Hovind. Was it taken off?

Rose

It wont play with any normal media player you need the DivX player that you can get for free at: (www.divx.com) www.divx.com.

I took the hovind files off because they were too big and I am not going to host divX files because of there extremely large size. I am worried about bandwidth as the site gets more traffics and downloads.

Hey Greg,

Do you think your new server can handle the extra traffic for Hovind's videos?

Anyhow, the videos are on my server on www.CreationEvidence.net

At this time I want to keep this site on the new server. I will see at a later time if I can expand to offer more high quality video downloads. I recommend everyone to check out peters website its definetly a blessing!

I checked out the other website.

Thank you.
