Dear everyone at SI,

This is to let you know that a new biography of T. Austin-Sparks has just been published in the USA. It is called "Shaped by Vision", and has been written by a brother I know well, Rex Beck.

If you wish to purchase a copy, please go straight to the link below, and order it from there:

Thanks brother, this will go automatically to the top of the list!

Have you read it yet? Just curious...

Hi Mike

I am half way through the book. The book has two main parts: the first is the biography proper, the second is a summary of some of the writings of TAS. Most of the information has been gathered from the editorials of the magazine "A Witness & A Testimony". There are no pictures included, these being so scarce.

Overall the book is quite good. You will notice though that the "Contents" page does not correspond to the "Chapters" nor to the "Index", obviously an editorial mistake.

It would seem that the author is a "Local Church" sympathiser - this has to be remembered when the book is being read.
