from the article:

“I have concluded that we are in a world made by rules created by an intelligence. Believe me, everything that we call chance today won’t make sense anymore,” Kaku said, according to an article published in the Geophilosophical Association of Anthropological and Cultural Studies.

“To me it is clear that we exist in a plan which is governed by rules that were created, shaped by a universal intelligence and not by chance.”

Awesome!

Thanks brother Todd:)
