I was wondering if anybody has seen this dvd/video documentry on the life of Keith Green? Have you considered it worth the \$15 Last Days Ministries charges for it? Will I gain much more insight into his life as a result, that I have not already gained from his bio and ministry years cd's?

Also, can anybody else recommend anything else from his site?

It's basically the video version of the book, "No Compromise". You won't really gain any more information from the video that you gain from that.

If you're a fan of Keith Green's ministry and legacy you'll still enjoy it though.
