I seem to be stuck in login mode. It won't shut off when I logout. Shows up on Who's Online whether I am logged in or not.

Hi Linda,

Guessing here but...

Are you just closing the web browser or clicking on "Logout" ?

If you do click on the "Logout" it doesn't automatically disappear. Try clicking on it and then closing your web browser.

Open up a new web browser and bring up SermonIndex again, you shouldn't see your name logged in. Let us know if you still do.

Re: logging out - posted by linda7 (), on: 2006/5/18 5:13

I have lost the long reply to a thread that I was replying to. I am trying to find it by using my History window on my computer.
