Ray Comfort Sermons being removed... - posted by sermonindex (), on: 2006/6/8 12:58

Due to policy changes at Living Waters Ministries I am going to have to remove most of Ray Comforts sermons from sermonindex in the next few days. This is a grace period given for people at sermonindex to download the other sermons before they are deleted off the sermonindex database.

Here is the ray comfort section:

If you have any questions let me know.

Yes, Giancarlo works with the living waters ministry and will be able to adequately answer any questions in relation to this new policy and decisions by the Living waters ministry.

Is this just a continuation of the previous changes, and now they have decided that the changes should go ahead and include SI as well?

Yes.

Re: - posted by sermonindex (), on: 2006/6/8 16:20

I really encourage people to **download** all the ray comfort sermons for a personal use archive, not to be distributed. After the sermons are taken down they will be available to be ordered via www.livingwaters.com in hard copy format.

This will probably be the last day these sermons will be available and 95% of the Ray Comfort sermons will be taken off the site. Take the time to download them if you want them for personal use.

Brother, can you recommend some worth hearing sermons for download?

Re: - posted by sermonindex (), on: 2006/6/9 14:30

The "Axe of the Apostles" series is a great one to download as a good reference and teaching on evangelism.

"Comfort in 1 John" the series is a great short one to get also.

"Hells Best Kept Secret" of course is his best message but thankfully that will be able to remain on the website. It is on the top 20 downloads of this website.

Some other good messages to download:

- How to Get on Fire for God
- Keys to Revival
- Militant Evangelism
- SI Interview of Ray Comfort :-)

I have that one :-)

Thanks for the others.

I have deleted over 100 sermons by ray comfort equalling in over 10,000+ sermon downloads. Now there are about 10 sermons offered by Ray Comfort that you can download and distribute freely:
