how do I download a sermon onto a cd?

Re: how do I download a sermon onto a cd? - posted by sermonindex (), on: 2006/8/4 19:54

Quote:
------------------------how do I download a sermon onto a cd?

STEP 1: right click on the sermon title you want to download and choose "save target as" then rename the file to the sermon title and speaker and choose your desktop and then press save.

STEP 2: Once the sermon has finished downloading you can burn it to a audio cd from the mp3 format with either software on your system already or speacial CD burning software. Most CD burners come with software.

for windows xp simply put in the blank CD and drag the mp3 file into it and then write the files to CD and choose "AUDIO CD" option to make it playable on normal stereo players. follow the wizards and it should be easy.
