I'm just wondering about these, i got a Thayer's and a Strong's, i think these are great tools to get a little deeper in the studies,

I'm just curious what other books are good when one want to read slowly and meditate verse by verse word by word...

If you get one of those four or seven in one translations, they are good. because you are able to compare side by side either four, or seven translations of the same verse. It can bring a lot of insight to each individual verse.

I don't know of a specific brand though.
