Logging Out - posted by divdasunder (), on: 2007/4/9 6:08

I seem to be having problems logging out. After I log out, I am still being told that I am online. I have even closed the browser and reopened it.

Remember the old Eagles song? Hotel California? "You can log out, but you can never leave..."

Hmm, interesting.

Tried a few things to see if I could understand why this is happening and had the same results ... Will see what Greg can find out.

That happens to be from time to time... I can't do any of the fuctions that I could if I were really logged in, but if I look under Who's Online my name is there.

So from my end it looks as though I am logged off but my name is under Who's Online.

Is this the same that is happening to you?

The same thing happens to me!

(Krispy - you have a most wonderful way of expressing yourself :-))

It's a issue with cookies. I wouldn't worry about it, its better to be "automatically" logged in when you visit the page.

-----Who's Online
There are currently, 41 guest(s) and 10 member(s) that are online.

sermonindex, hmmmhmm, Roniya, more...

In this section it will show you logged in for a 2-5 minute delay at times. So if you don't disappear from that list immediately that still can mean that you are logged out.
