I have read with interest the discussion from Jordan and others re the above.

Might I say, that before reading these things, these details never occurred to me. What has been uppermost in my mind is only the powerful impact that the content of the Audio sermons and writings can have on the human spirit. If it was possible to listen to the Saviours voice of 2000 odd years ago, these small matters might hardly be noticed as we would listen spellbound to his voice.
