If you use a computer or pocket PC, then the best program (and FREE) is at [www.e-sword.net](http://www.e-sword.net)

There you can find bibles in almost any language interconnected with commentaries and dictionaries. It is the best bible study program. You can also write your own comments for each verse and when you come back to the same verse, it comes up as your own commentary!

Try it. You'll love it.
