Did you know that the leader of the Moonies in the U.S. claims that George H.W. Bush drank their "holy wine" which symbolizes the blood of "Reverand" Moon?

And did you know that some Moonies actually believe that the "holy wine" actually is the blood of cult leader Moon?

Did you know that this "holy wine" comes in presealed packages and that some investigators believe there is more than just wine in those packages?

The YouTube clip in the following article is simply astounding:
