

SermonIndex Announcements :: Atlanta, Georgia Revival Conference and Apple Computers (mac)

Atlanta, Georgia Revival Conference and Apple Computers (mac) - posted by sermonindex (), on: 2008/10/9 20:33

Saints,

I am looking for 1-2 apple mac laptop computers to use at the revival conference, if some saints have good laptop computers that are apple and wanted to allow them to be used during the conference that would be great!

We would also need to have XP loaded on it (as a dual boot). This computer will be used for the live webcast. Please email me if you have such a computer you could bring to be used for this.

Saints,

in God's grace and through prayer we have figured this situation out and even have a backup computer to run the webcast. Praise be to God.
