It is very strange on my monitor. I have Internet Explorer...and it is difficult to read. It is stretched out (wide and long).

I hope that Greg can fix it soon!

I'm using Internet Explorer as well. It's messed up. Still functional, but messed up.

I was using Internet Explorer and couldn't even log in. Much of the page is missing. I switched to our Mac and things look fine. I can't use the site at all with IE.

I know Greg is busy in Scotland- let's hope he's not too busy to find out the problem :)
