Help with downloads!, on: 2009/1/26 20:38

I recently tried to download a Tozer mp3, however, it was sent to my computer as a php files (What is a php file by the way?). How can I successfully down load these mp3s so that I can listen to them on my computer.

Thanks for your help,
Jason

Hi Jason,

Just change the extension from .php to .mp3 and it should work just fine. It does for me anyway.

Re: , on: 2009/1/26 21:40

Thanks!

I'll give it a try.

Edit -

It worked.
Thanks again!
