

SermonIndex Support :: Downloading to Itunes

Downloading to Itunes - posted by thumpersandy, on: 2009/6/3 13:46

Ok... I'm new here and don't understand technology. Is there anyway I can download to my i tunes? When I try to download, the sermons play in quick time. Any suggestions?

Blessings & Thanks!

You can save the messages as MP3 files by Right clicking on the messages link. Then you click "Save As" for it to be stored on your computer as MP3 and you will be able to listen to it on your itunes.

1. Right click on the message
2. click "Save as"
3. choose where on you computer to save it to (Desktop is good)
4. Click on the file (Should automatically open to itunes).

I'm having the same problems. A window with quick time opens when I right click. I never see a menu that gives me the option to 'save as'.

If you are using a mac you need to hold down CTRL and then click to get that option.

I recommend highly for you to download the download manager if you are using a pc, the link to get it is here: <https://www.sermonindex.net/modules/contact/>

Re: Free Download Manager - posted by mackaymarsh, on: 2010/7/9 14:36

I use the 'Free Download Manager' and it works great. Take a little time to tweak it and it should do great.
