Does the link work? I noticed there is a review asking the same thing at the download module for this mp3.

Allit does it load and load and load and load and load.

Would really like to get this to a few German friends.

Hi,

this link should work you must right click on it and choose save target as:

That link works but it's the hymn in English. Thanks for the efforts though; they are appreciated.

It has german subtitles. There is no revival hymn with german sound because the audio is old preachers preaching.

I hope that clarifies things for you.

Ah I see. It originally opened for me as just an audio file. Thank you much!!!
