Welcome & Intro :: putting sermons on my ipod

putting sermons on my ipod - posted by gandj, on: 2009/11/9 23:17

Hi all
I have recently found this site and love the sermons of Leonard Ravenhill. I want to put his sermons on my ipod so I can listen to him while at the gym. Can anybody tell me how to put sermons that arent on podcast onto an ipod?
Thanks for your help.
Glenn

Hi gandj,

You might just try loading them like a regular song file. I don't have an Apple iPod, but I do listen to them on my Windows-based smart phone and another mp3 player. Most of these sermons are already saved in mp3 format. I simply upload them into the music folder of my mp3 player and phone and then access them just like I do other audio files (like music). For convenience, I usually rename them using the last name, first name followed by the sermon title. For example:

Ravenhill, Leonard - Holy Ground.mp3

Anyway, I hope this helps.

 :-)
