I want to put Leonard Ravenhill sermons that aren't podcasts onto my iPod via my iMac. Can anyone suggest how to do this?

Glenn

can anyone help resolve this and walk this brother through the steps?

I think what you will need to do is download the MP3 files. I think on Macs you "option-click" the link and select the "Save Linked File As..." option.

Once they are saved to a folder, you can import them into iTunes. In iTunes, I believe you will go to "File" and then "Add to Library". Then you should be able to select the folder you want to add to your iTunes library.

Once the songs are in your library, you should be able to add them to a playlist and sync them to your iPod.

Hope this helps!
