SermonIndex Support :: htmls not working?

htmls not working? - posted by philologos (), on: 2010/6/29 5:18

It looks as though the HTML tags for 'quote' and 'URL' are no longer working. Is this just my problem or are others experiencing the same?

Re: htmls not working? - posted by Lysa (), on: 2010/6/29 7:42

it's not just your problem brother! it's everyone's problem!

Let us pray that someone who knows PHP language very well comes along side of Greg and can help him, all for the cause of Christ!!

God bless you,

Saints,

I have been working on fixing these issues. At this time the consensus is to have the
Quote:

----
 feature working again and for the URLS to just make it so when someone types in www.sermonindex.net or https://www.sermonindex.net that the urls will link "automatically". also I am going to try and have the bold and italics working but other then those functions all other functions will not work to ensure simplicity of style and readibility for the forums.

I trust that makes sense and do pray I get some help with this in the next 1-2 weeks.
