

SermonIndex Support :: Right Click Opens New Window

Right Click Opens New Window - posted by checkersk, on: 2010/7/9 11:09

I am trying to download a sermon. When I right click on the title of the sermon, a new window pops up. The only thing in the new window is a player that begins to play the recording. There does not appear to be anything to 'right-click' and 'save-as' in the new window. I have tried it in both ie and firefox. Will you please be so kind as to let me know how to do wnload?

If you right click in firefox the option is "save download link as".
