

SermonIndex Support :: BB Code not working in Chrome

BB Code not working in Chrome - posted by learjet, on: 2010/12/4 14:32

Just thought that I'd let you know that the BB code is not working in Google Chrome. I see all of the BB bold and italics tags instead of the desired bold and italicized words.

Not sure if anyone brought it up so I thought that I'd let you know.

In Christ,
Earl J

Hi.

We have removed all coding functions so just a weblink will work if you just type it in like: www.sermonindex.net so the bbcode will not work anymore.

Ok, cool

Thanks Greg!

In Christ,
Earl J
