Would really value your comments of a sermon I preached one week after the earthquake. Ps. Steve Dunne

Brother,

We appreciate you registering on the site and being a part of the community but wanted to let you also know that we do not allow people to post their sermons on the forums or promote their websites on the forums. It is fine in this situation to keep this post up but I would ask in the future it not to happen again.

I appreciate you brother and your heart in this matter. I listened to some of the sermon one recommendation it seems to be very low volume, if someone could boost it, that would help.

God is trying to get everyone's attention these days. Bless you brother as you pastors God's precious flock in New Zealand.
