I'd be laughing too if the richest country in the world sent all of me their middle class manufacturing jobs. And not only that, but they are being sent with the full blessing of the U.S. government. China laughs. Then China produces junk and sends it back to us and we have no choice but to buy it because there are no American manufacturing companies. China laughs some more. Then millions of Americans lose their jobs because they were exported to China, and China must think what fools we are. At that point I don't know if they laugh or just feel sorry for us.
