Washington (CNN) — Chuck Colson, the convicted Watergate figure turned evangelist, is in critical condition after undergoing surgery over the weekend following a brain hemorrhage, according to his publicist.

“Colson is listed in critical condition at this point but has shown some early signs of potential for recovery,” said a statement Tuesday from the DeMoss Group. A spokeswoman for the PR firm said Wednesday morning that she had no update on Colson's condition.

I had the opportunity to meet Chuck Colson while walking through an airport a few years ago. He was very kind and seemed genuinely interested in our conversation.

He will be in our thoughts and prayers.

\*EDIT - BTW, Mr. Colson also asked if he could pray with me while we were in the middle of a very busy Atlanta airport. I was appreciative of such boldness.
