

## SermonIndex Support :: Distorted Audio

### Distorted Audio - posted by Mr\_Nath, on: 2005/3/1 19:00

Hi. I am running WinXP, Downloading by Right Clicking and playing my clips with Winamp (am on dial-up).

For some reason, the 3 clips I have tried to download (Leonard Interview, David Wilkenson Full Time Ministry & ten Shekels and a Shirt) all complete but the audio has digital squaking/distortion all the way through it. I don't understand why?

In the past I have downloaded your files from a friends PC with broadband but have always been able to play them here on my laptop and burn my CD's with no trouble. But for some reason I have this trouble if I am downloading them here?

Any help would be greatly appreciated.

I am running Zone Labs and Avate Anti Virus.

Mr Nath.

I would recommend you try playing the clips on windows media player or another media player to see if its just a problem with the sound card working with winamp.

If that doesn't work I would suggest getting a free download manager from [www.download.com](http://www.download.com) to ensure you get the files downloaded to your hard drive without them being corrupted.
