must watch garden video - posted by proudpapa, on: 2013/1/9 15:50

I found this to be more than just a great garden video, it reveals Gods ways as being so supiour to our own ways. sucessful gardening without tilling, fertalizing, watering or using pesticides great video

,BACK TO EDEN shares the story of one manÂ's lifelong journey, walking with God and learning how to get back to the simple, productive methods of sustainable provision that were given to man in the garden of Eden. The organic growing system that has resulted from Paul GautschiÂ's incredible experiences has garnered the interest of visitors from around the world. However, never until now have PaulÂ's methods been documented and shared like this!,

Thank you so much for this link! I liked it from the start but when I saw it lasts 1 hour and 40 minutes I thought no way wil I I watch all of this. Well, I was wrong. It's worth watching for the practical advice, the nutritional info and the devotional p arts alike. Fascinating.

It is an incredible, amazing and fascinating video to watch.

It is certainly more than just gardening, because God is involved.

Thanks.

Very interesting. Too bad it is so long...I was telling my husband about it and he told me to watch it and then tell him wha t he said. SIGH

I think there are a lot of excellent points to be learned from it. Thanks for posting it.

Re: must watch garden video, on: 2013/1/11 16:27

wow, not only is this incredibly informative, as you say proudpapa, much God has to say about Himself being the Garde ner!

Wonderful God, on: 2013/1/11 17:38

Sisters and brothers,

I am weeping over this testimony of Paul Gautschi Like Jesus with the parables of the sower and the farmer and the gar dener...what a way to reach out to the young people who are so searching for the answers in everything organic.(One of which a daughter of mine.)

And as a couple in the movie say, God is releasing this now so that we can prepare for the days ahead in growing our o wn food. Thank you, brother proudpapa for posting this. God is so good, so wonderful, so wanting to pour out the abund ant life on us.

It is also a picture of our "depleted" soil which is not bearing good fruit...like the organized church, the institutional way of thinking, the ways of man....we think we are rich but we are wretched, pitiful, poor, blind and naked. Dear Lord, forgive u s for going our own way. Restore us to your way in all areas of our life. In Jesus Name
LM

It is getting close to time to think about gardening so If anyone missed viewing this video before, I would encourage giving it a look.

bump

Re: , on: 2016/3/17 19:23

Perfect timing, for my garden.

Thanks!

Re: , on: 2016/3/18 2:08

Thank you pp

When I was younger I thought organic gardening is more for the "tree huggers " etc.

But over the years I learned that if we garden the way God planned it and eat the food the way He created it, it is best, it is truly a Master plan that fits together. You might know that, maybe a few decades ago, some of the healthiest people on this planet lived in Hunza in the northern part of Pakistan. They were very poor then and more or less lived off the land. I was able to visit the area a few years ago. Things have changed a bit now and the locals told me that bad food has a bad influence.

If once we can see a perfect master plan then it becomes obvious that if we start to modify this perfect plan it can't be good anymore. I'm obviously referring to GMO, but I don't want to go too much off topic here.

"In the beginning GOD created ..." and His testimony is clearly visible today !
