The church I went to used a teaching by Rick Warren for home groups. My wife and I went to one of them, which was a spanish group, and the leader was concerned about the churches choice of Rick Warren.

His teaching reminds me of the nonsense I heard on the radio going to work the other morning. The really meaning of success is doing what God wants you to do. Since when Does the gospel becomes a business oriented machine? When a person talks about success they are talking about business ventures and Rick Warren does some of this as well.
