### Attacks On Christians in Egypt Nothing Less Than Satanic Says Leader Inside 'Furnace of Fire' - posted by sermonindex

The recent barrage of attacks on Christians in Egypt, including on members and churches of the nation's Coptic denomination, are of a scale unseen in modern times and being described as satanic, according to sources living in the country. The persecution watchdog group, Open Doors USA, says Egypt is engulfed in a furnace of fire and Christians are taking on the brunt force of the attacks.

"The attack against the Christians of Egypt is nothing less than a furious satanic attack that aims at terrorizing Christians, imprisoning them at their homes helplessly with no guarantee of protection so their love, peace, hope and testimony may be neutralized," stated an anonymous Christian leader, whose name is being withheld for security reasons, in a letter forwarded to The Christian Post by Open Doors USA.

"We, Christians of Egypt, are facing a severe time of persecution and suffering that we may have not witnessed since the Roman times!" the source explained.

Not to minimize the attacks, but it was just a few years ago that the christian community in Egypt protested with the various factions in that country to overthrow the dictatorship that was there. It is never a good thing to ignore the principles of God, so maybe what the Lord is trying to get to come from the Egyptian Christian Leadership is genuine admission that they may have made a mistake and real contrition and repentance. Then watch and see what the Mighty God our Saviour would do on their behalf.
