I mentioned this before. Are we paying attention? It keeps making news.

Re: Tech can make anyone appear to say anything , on: 2015/12/10 9:34

Yes, I have been reading where they want to continue using actors in movies long after they have died.

I don't believe much of anything, sensational and melodramatic anymore on the screen or TV, especially when it gets spun right away for some type of political gain.

I have heard it said that DARPA is using technology that the public won't see for at least 10 years.

Thank God the Holy Spirit is independent of "group think" and a gift we cannot do without in these days.
