Is there a way to download or "save" a sermon on SI to your iphone so it can be listened to w/o streaming it? I feel rather dumb that I don't know how to do this.

Re: dumb question about downloading a sermon - posted by MrBillPro (), on: 2017/3/8 18:16

Todd, what I do is I just click on the link to the audio file, and I copy and paste it to my notepad "iPhone" then when I want to listen to it, I can just click on the link and it takes me right to the sermon, best I know how.

when I select a sermon using my android a download icon appears next to the player. Downloads as an mp3 to my phone.

Re: - posted by sermonindex (), on: 2017/3/8 18:50

Q. How Do you download the audio sermons?

Answer. To download the audio sermons to your desktop simply right click on the sermon titles and choose save target as. A dialogue box will open and rename the sermon file to the title of the sermon and the speaker adding the .mp3 extension on the end of the file. If a .php shows up as the download file simply rename it to .mp3 (or .pdf if it is an ebook file) and it will work.

Re: dumb question about downloading a sermon - posted by Sree (), on: 2017/3/8 19:18

The answer depends on the type of phone you use. Iphone will not allow you to save the sermon. If you want to do it, you have to download the sermon in your laptop and then transfer it to your iphone using itunes.

An android allows you to download the sermon directly. Everytime you hear a sermon it is actually downloaded in your Android. You can go to your file manager, downloads folder to see the sermon. If the sermon has a proper name then you can also scroll and find the file in your audio player.

That is why I love Android.

Sorry If I've misunderstood any previous answers.

If you wanted to download and play a file without having to stream it live on an iphone you are probably better off with the Apple app for iphones and iPads called 'Goodreader'. As it has got its own internal web browser and files can then be downloaded to the App and played...

Re: - posted by MrBillPro (), on: 2017/3/8 19:59

Apple likes to keep all audio files within iTunes. I guess if SI had the sermons hooked up with iTunes somehow, this would probably work. There are quite a few different things you can download for free on iTunes. You could download them to your pc, then upload them to your iPhone, I have a program to do this with on my pc.

I think Greg was addressing how to do it on a desktop computer, I guess he missed the part where you said iPhone.

Re: - posted by TMK (), on: 2017/3/8 20:48

Thx everyone. I didn't think of downloading on PC and syncing to iPhone.

That'll work.
