

**SermonIndex Support :: Website not secure?**

**Website not secure? - posted by Lysa (), on: 2019/3/17 8:16**

I was logging in this morning for the first time in months and in the address bar in red letters it blinked, "Not Secure." With a red triangle next to it.

Is this website secure or not? Of course, I typed in my password anyway!!! :) But I thought I'd ask!!

Thank,  
Lisa

Sister,

yes we are looking to move the site to https in the future as a lot of browsers are requiring this now as standard or they give warnings.
