Jammed Evangelism

Once upon a time, the Communist Party in the Soviet Union erected blocking towers in Khabarovsk (east coast of Russia) to block out gospel radio signals from Far East Broadcasting Company (FEBC) in the Philippines and beyond. Today that Khabarovsk site is the home of FEBC Russia.

What's more, some of those who worked for the communists, as atheists, jamming gospel radio signals there, still work at that site today, for FEBC Russia, as Christians, broadcasting the gospel.

Albanian Communist dictator Enver Hoxha established Radio Tirana to propagate atheism throughout Albania. But today Trans World Radio (TWR) broadcasts the gospel from that same site. The Living God, who always has the last word, has an amazing sense of irony.

The Chinese Communist government has decided to combat rising religious activity by actively promoting "orthodox" atheist Communism. They will discover however, that feeding a spiritually hungry person with atheism is like giving a thirsty person an empty glass. It cannot compete with the One who freely offers "springs of living water" (Isaiah 55:1,2; John 14:13,14).

I look forward to the day (which is most surely coming) when I can write a post-script to this story, similar to the ones above.

E. Kendal

This is an incredible testimony. I wish and pray we were able to produce many more like these.
