Please take seriously the severity of this existential threat to everything free people hold dear. Do everything in your power to pass this report on to others and to find ways to communicate with and to influence people to stop empowering WHO to take over our national sovereignty and freedom.

On May 22-28, 2022, ultimate control over America's healthcare system, and hence its national sovereignty, will be delivered for a vote to the World Health Organization's governing legislative body, the World Health Assembly (WHA).

This threat is contained in new amendments to WHO's International Health Regulations, proposed by the Biden administration, that are scheduled as a Provisional agenda item 16.2 at the upcoming conference on May 22-28, 2022.

These amendments will empower WHO's Director-General to declare health emergencies or crises in any nation and to do so unilaterally and against the opposition of the target nation. The Director-General will be able to declare these health crises based merely on his personal opinion or consideration that there is a potential or possible threat to other nations.

If passed, the Biden Administration's proposed amendments will, by their very existence and their intention, drastically compromise the independence and the sovereignty of the United States. The same threat looms over all the U.N.'s 193 member nations, all of whom belong to WHO and represent 99.44% of the world population. (Read more)

I'm not sure how accurate this is. However, it cannot pass constitutional muster in the United States. Article VI Clause 2 of the U.S. Constitution says:

"This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, SHALL BE THE SUPREME LAW OF THE LAND; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding."

<https://constitution.congress.gov/constitution/article-6/#article-6-clause-2>

Now, even as a treaty, the Constitution stipulates that a president would need two-thirds of the Senate to agree to it. Regarding the authority of the president, Article II Section 2 of the Constitution reads:

"He shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, PROVIDED TWO THIRDS OF THE SENATOES PRESENT CONCUR."

<https://constitution.congress.gov/constitution/article-2/>

Now, the U.S. can be a member of the U.N.'s World Health Organization (WHO). The U.S. can even donate money to it (although there is a strong argument that a president doesn't have the power to join it without the consent of two-thirds of the Senate).

However, even as a member of the WHO, this doesn't mean that the WHO can have any authority over any laws or policies in the United States unless voted upon by two-thirds of the Senate. Without a treaty approved by two-thirds of the members of the Senate, any WHO demands, restrictions or requirements are little more than "recommendations" that must be voted upon by the Senate.

Heavenly Father, we praise You for bringing this information to light. Help us to be brave and courageous. Help us to remember that You alone are good. Help us to share Your true gospel in this evil age and present darkness. Help the oil in our lamps to shine bright and not diminish. Help us to stand for Your truth and not our perceived truth. Your will be done on earth as it is in heaven.

Many intercessors have reached out to IFA to encourage us to warn you about upcoming events in Washington and at the World Health Organization. While anyone attending sporting events, movies, dining out, etc may feel that the pandemic is over, President Biden seems to be gearing the world up for more intense pressure to vaccinate.

Thursday, May 12, 2022 and Sunday, May 22, 2022 are critical days. We have sketched out the timeline of events for you and included an excerpt of Wednesday's White House statement. We join IFA intercessors in urging you to pray.

[VIEW COMMENTS \(194\)](#)

Timeline:

On April 12, 2022, the World Health Organization published Provisional Agenda Item 16.2 which includes an amendment proposed by the United States. Adopting this provision will require 193 UN members to place themselves under the guidance, direction and authority of the World Health Organization in the ongoing face of the Covid pandemic and any future pandemic announced at the discretion of the WHO. Here is the Agenda Item in its entirety on the WHO website.

One week later on April 18, 2022, the Biden Administration announced plans for the 2nd Covid Global Summit which will be held virtually on Thursday, May 12, 2022 encouraging attendees to come with plans to vaccinate the world, save lives now and build better health security. The announcement includes a 5 point plan of action beginning with "getting shots in arms now."

Dr. Anthony Fauci stated last May that herd immunity would be achieved with 70% of Americans being vaccinated. Worldometer reports as of today 473 Million people worldwide are documented as testing positive and recovering from covid.

Note not all positive cases of covid have been reported/captured by data analysts. Additionally, 65%, or 2/3 of the world population has received at least one Covid vaccine with 59% of the world being fully vaccinated.

People are recognizing that natural immunity as a result of surviving infection also provides protections at about the same level as being vaccinated. According to the United States Centers for Disease Control and Prevention, "Multiple studies in different settings have consistently shown that infection with SARS-CoV-2 and vaccination each result in a low risk of subsequent infection with antigenically similar variants for at least 6 months."

Why would the United States Government need to cede authority to the World Health Organization for pandemic guidance, direction and authority?

Yesterday on May 10th, the White House released this statement identifying other members of the global community who will attend the summit on May 12th. Among them are CEPI, The Gates Foundation, GAVI, the World Bank Group, the World Trade Organization and MasterCard. Their top two goals are to recommit intensity to a global response for Covid and vaccinate the world to protect the most vulnerable and prevent future catastrophes.

The United States is responsible for shipping out four times more donated vaccines to poorer countries than the next closest donor.

Let the IFA community know how to pray for you

10 days later the United States will present Provisional Agenda Item 16.2 to the United Nations ceding health authority to the World Health Organization on our behalf and the behalf of UN members. If received favorably, which is expected, implementation will begin in November 2022 and expected to be completed in May 2024. Israel365's Adam Eliyahu Berkowitz comprehensively covered this story here:

"Officials from the Biden Administration are working to give the World Health Organization the power to unilaterally declare a health emergency in any country, thereby giving them emergency powers. The message from the administration and the vote are going unreported by the heritage media, but former Congressman Michele Bachmann is working hard at sounding the alarm.

"Bachmann has stated that the upcoming vote in Geneva over the Biden Administration's amendments would cede U.S. sovereignty to the WHO over national healthcare decisions in what she described as "the biggest global power grab that we have seen in our lifetimes."

According to a report in the Independent Sentinel, "The WHO is attempting to push through changes to a treaty that would give them global control over health worldwide. This helps fulfill some of the goals of the WEF's Great Reset. It is a massive power grab that takes away a nation's sovereign rights to determine its own health standards.

A decision will be made by vote on May 22-28 at WHO World Health Assembly. Two-thirds of the Senate does not have to vote for it. It's a rule change but it's a devastating one."

How is the White House framing this concerning meeting agenda?

Below is the official White House messaging through official press release. Prayer points have been added by IFA, shown in bold italics:

The United States as first COVID Summit Chair, Belize, as CARICOM Chair will co-host the second Global COVID-19 Summit, which will be held virtually on Thursday, May 12, 2022. You can be in prayer about this Summit-pray that any plans put forth that would be harmful to sovereignty and freedom would fall apart.

We will be joined by countries, other partners, non-governmental organizations, and private sector companies who have made financial or policy commitments. Some of those will include Google; Clinton Health Access Initiative; the Bill and Melinda Gates Foundation; and the Mastercard Foundation. In addition, international and regional organizations will participate, such as the World Health Organization.

Pray that these global health magnates would not have consensus in plans they may seek to make.

Together, the Summit will redouble our efforts made at the first COVID Summit and will focus on four key objectives:

Recommitting Intensity to Global Response. The pandemic is not over, and now is the time to prepare for the next one. The Summit will focus on securing new resources and policy commitments to control COVID-19 in 2022. Pray that the power that has been misused via the pandemic would not continue to be perpetuated.

Vaccinating the World. Vaccination remains the most important lifesaving tool in this pandemic. It is also the most effective means to fight emerging variants. Pray that increased mandates for vaccinations would not stand.

Protecting the Most Vulnerable. The Summit will focus on getting vaccines, tests, and treatments to those at highest risk, like the elderly, the immunocompromised and frontline and health workers. Pray that truthful reports on the side effects of these vaccines would be transparent so citizens could make the best decision for their own health.

Preventing future catastrophes. By investing now to secure political commitment for pandemic preparedness globally. The Summit will focus on expanding and financing country capacity, health workers, disease surveillance, and medical countermeasures, including through the new pandemic preparedness and global health security fund at the World Bank. Pray that plans to use future health crises to exert control over nations and citizens would not come to pass.

President Biden and fellow heads of state from the co-host nations will kick off the Summit with remarks on how fighting COVID-19 must remain an international priority. The Summit will then feature three sessions focused on getting shots in arms, expanding access to tests and treatments, and advancing health security and preventing future catastrophes.

To date, President has committed to sharing 1.2 billion doses of safe, effective vaccines with the world, and the U.S. has made good on that commitment. The U.S. has shipped over 530 million doses of vaccine to 115 countries around the world, over four times more than our next closest donor.

The U.S. and the co-host nations look forward to another successful Summit to accelerate the international response to combat COVID-19 and to advance global pandemic preparedness.

I do not believe it! Do not be fooled, this is intentional misinformation. If it were true, it would be verified on mainstream media and government sources. It is meant to cause strife and make conservatives appear to be gullable, if not stupid. This is just as much nonsense as other conspiracies that are heavily promoted by Americas enemies. Cry wolf calls are not harmless, they can cause serious damage.

It reminds me on Nehemia 6, where he exposed a conspiracy that would have discredited him.

Time will tell..

But like NP said, time will tell.

There are members from the legislature of Louisiana that have put forth a bill that would stop the health takeover of the WHO in our state.

I am just wondering if other states will pass such bills. It is not only the corrupt Biden administration that can try to sneak under the radar the takeover of the WHO, but the states also have rights such as the ruling that is coming by the Supreme Court on the overthrow of Roe Vs. Wade, that has always been unconstitutional.

Re: - posted by ccchhrrriiiss () , on: 2022/5/18 14:04

True. We should pray for our nation to oppose any surrender of sovereignty to foreign organizations.

That said: Even if the Biden Administration was actually attempting this, I would point out that any attempt to give the World Health Organization any control over healthcare in this nation is entirely UNCONSTITUTIONAL.

It would fail in the courts because no foreign organization or government has any jurisdiction over the nation, states, localities or people. Even treaties with foreign states or organizations would require a "yea" vote by two-thirds of the United States Senate.

Our enemy has been trying to fool us from day 1 of human history. If we believe to find the truth in the medias and government sources then we haven't learnt from the past and from the history of your own country

Chris wrote:

This might be true, but the constitution has been violated many times in the past, most people didn't care, many even said 'God bless America'

I don't think we understand the seriousness of the times we are living in. The enemy's intentions are carved in stone, literally. You can find the stones in Georgia.

I don't want to go off topic, just trying to point out the seriousness of the times we are living in and the urgency to pray, to repent, to proclaim the Gospel.

Blessings

I think Markus was referencing the Georgia Guidestones. Probably nobody on here believes Satan actually built them physically; however they do embody a very wicked agenda. You should look it up.

Re: - posted by drifter (), on: 2022/5/21 22:01

I don't think the Georgia Guidestones are guiding our fate. God is sovereign. But these stones did not just fall from the sky with writing on them. There are evil people who want to implement the tenets written on the stones. They reference a greatly reduced world population, a world court (government?), and world religion. That doesn't sound too appealing to me.

Re: - posted by AbideinHim (), on: 2022/5/26 6:21

Our prayers are working! 12 of Biden's 13 amendments submitted to the WHO have been at least temporarily removed from consideration. We must continue to pray that our sovereignty is preserved and the schemes of the enemy amount to nothing.

From WND. Amid charges of ceding U.S. sovereignty to the World Health Organization, 12 of the 13 amendments submitted by the Biden administration for a vote in the World Health Assembly this week in Geneva have been removed from consideration.
