From a YouTube video showing the incident:

An "11-year-old" Muslim girl with her family walked over to me in Times Square and told me to kill myself because Iâ€™m a Jew. I am not making this up. You must watch this. They then had their small child kick me to humiliate me while their daughter continued to say that I should kill myself. The mother was laughing during this. Also, other passerbys yelled at me that sheâ€™s white, and I should kill myself as a Jew. All of this happened right in the middle of New York City the night before Christmas. Anti Semitism is becoming unbelievably dangerous and deadly in the United States and around the world. We must fight this disease.
